DETAILED ACTION

Status

This communication is in response to the amendment filed on November 23, 2010.

Claims 1-5, 7-12, 14-26, 28-29, and 31 are allowed in this Office action (renumbered as **claims 1-27**).

Reasons for Allowance

The following is an examiner's statement of reasons for allowance of **claims 1-5, 7-12, 14-26, 28-29, and 31**:

The prior arts of record fail to teach the limitations of:

"automatically updating a synonym set representing known writing variations for the identifier in a computer readable database and referencing to respective entries in the reference data set by adding the value of the data field to the synonym set as a member referring to the accepted synonym candidate in the reference data set without intervention of a user before searching for a counterpart for the input customer data record, and
checking the input customer data record by searching for the counterpart for the input customer data record in the reference data set by comparing the value of the data field to the updated synonym set in the computer readable database after the step of determining if the predetermined synonym acceptance criterion is fulfilled" (**independent claims 1, 21, 24-26, 28-29, and 31**).

Claims 2-5, 7-12, 14-20, and 22-23 are also allowed based on their dependencies on **claims 1, and 21** respectively.

Summary of Related Prior Arts

The prior arts on record are summarized as follows:

i) Borkovsky et al. (*Pat. No. US 7,440,941*) teaches suggesting an alternative spelling for a search query when a request to search for files that match the search query is received. The alternative spelling is selected based on a set of factors including how frequently the alternative spelling occurs in a plurality of files and how frequently the alternative spelling occurs in one or more previously received requests to search for files.

ii) Rogson (*Pub. No. US 2002/0010726*) teaches parsing a user-entered word in a document to determine if the word is misspelled using a static update list to see if the misspelled word has an automatic correction. If the word is not in the static update list and the user corrects the misspelling, the misspelled word and the correction are both captured in a list. If the user corrects the misspelling a sufficient number of times, the static update list can itself be dynamically updated to recognize the correction regularly entered by the user.

iii) Toner et al. (*Pub. No. US 2004/0024760*) teaches transformation, normalization and correlation techniques that are effective for matching names of foreign origin that may be spelt in any number of ways. The main technique is to convert both strings to be matched into a representation of their original

Art Unit: 2165

language, i.e., transform them into idealized (normalized) versions of themselves based on their true spelling in their original, native language.

iv) Bellany et al. (*Pub. No. US 2002/0078024*) teaches retrieving a desired postal address from a plurality of postal addresses by receiving input data having input terms for finding the desired postal address from a first database of postal addresses where each postal address is formed of a plurality of postal address elements, searching a dictionary for entries in the dictionary corresponding to the input terms, determining that each entry in the dictionary that corresponds to the input terms corresponds to postal address elements of one or more postal addresses in the first database, and outputting data representing the desired postal address.

v) Murakami et al. (*Pub. No. US 2004/0181759*) acquiring a set of candidate synonyms similar to an input word for each writer from data for each writer, and acquiring a set of candidate synonyms similar to the input word from a collective data. A generated candidate synonym set is inputted to a candidate synonym determination device to evaluate the candidate synonyms of the collective data and matching words are outputted as a result of an evaluation process.

Any comments considered necessary by the Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
